

Button and tab color | Open layouts

The highlight color sets the color of the buttons on the registration page and the primary and sidebar tabs in the event window.

Note: The text color is automatically set to white or black, to contrast with the highlight color. If you select a dark color, the text is white. If you select a light color, the text is black.

To change the highlight color:

Go to the Player & Branding tab. Open **Advanced Branding** and set the Highlight Color.

This example shows green buttons on the registration page and green tabs on the event window.

The image illustrates the application of a highlight color across different parts of the user interface. On the left, a color picker is shown with the label "Highlight Color" and the hex code "#4a9900". A small green square icon is next to the code. Red lines connect this color picker to various elements in two screenshots:

- Registration Page Screenshot:** Shows a "Keynote Kickoff" event page. The "Add to Calendar" button and the "Register Now" button are highlighted in green. The "Register Now" button is also highlighted in the sidebar on the right.
- Event Window Screenshot:** Shows a video player interface. The "Slides" tab in the sidebar is highlighted in green. The "Ask a Question" button and the "Send" button are also highlighted in green.
