

Allow people to attend an event without registering

If you do not want to collect any information from attendees, set up the event with no registration form and allow people to attend anonymously. To allow attendees to access the event even faster, you can also have them bypass the landing page when they click the event link and join the event immediately.

Without a registration form:

- Information about individual attendees will not be available in registration reports
- Viewing data will not be available in event reports
- You cannot send event reminders and follow-up emails to attendees
- Attendees will appear in reports with a generic placeholder email address, such as `guest#####@webcasts.com`

To hide the registration form:

1. On the left panel, click the **Registration** tab.
2. Under Registration Type, select **Use Anonymous Registration**.

A screenshot of a web interface showing the 'Registration Type' settings. The title 'Registration Type' is at the top. Below it is a light gray horizontal bar. Underneath the bar are two options: 'Use Anonymous Registration' with a blue radio button that is selected, and 'Skip landing page' with an unchecked checkbox.

Registration Type

☒ Use Anonymous Registration

☐ Skip landing page

3. Optional. Select **Skip landing page** to have attendees bypass the landing page.
4. Click **Save and Continue**.
