

# Edit a computer-generated transcript

For automated transcripts. You can open a generated transcript in the editing studio and review and edit it. The transcript includes time codes that allow you to play the audio from the beginning of the phrase, so you can compare each transcribed phrase to what was actually said. You can also use the search bar to search for words or phrases in the transcription that you know need to be corrected.

The system uses colors to highlight words that need to be reviewed for accuracy.

- Red indicates a low level of accuracy. Words might be transcribed incorrectly.
- Orange indicates a good level of accuracy. Words are probably transcribed accurately, but might be incorrect.
- Blue indicates text you edited.

**Note:** When you save the transcript draft, the text you edited changes to black.

▶ || The impact of artificial intelligence on workers includes both applications to improve workers safety and health and potential hazards that must be controlled.

00:00:12

▶ || One potential application is using AI to eliminate hazards by removing humans from hazardous situations that involve risk of stress, overwork or muscular musculoskeletal injuries, predictive analytics may also be used to identify conditions that may lead to hazards such as fatigue, repetitive strain injuries or toxic substance abuse leading to earlier interventions interventions.

00:00:37

▶ || Another is to streamline workplace safety and health work flows through automating repetitive tasks, enhancing safety training programs through virtual reality or detecting and reporting near misses when used in the workplace.

00:00:50

▶ || AI also presents the possibility of new hazards.

00:00:54

▶ || These may arise from machine learning techniques leading to unpredictable behavior and inscrutability in their decision making or from cybersecurity and information privacy issues.

00:01:06

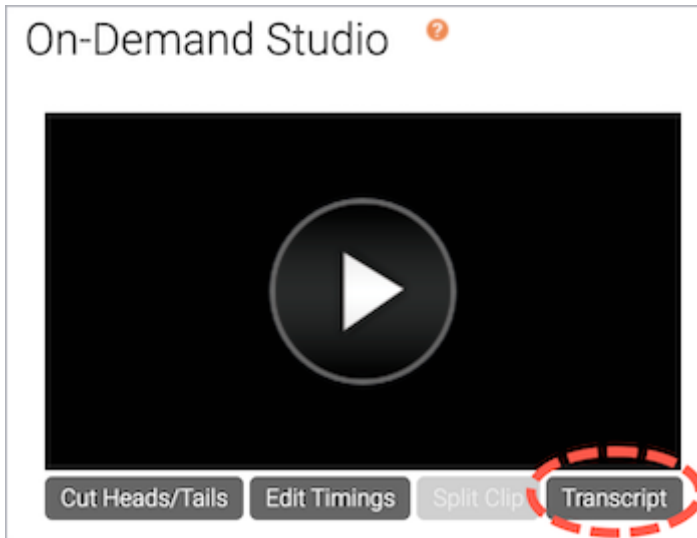

▶ || Many hazards of AI are psychological due to its potential to cause changes in the work organization.

After you save your changes and publish the event, the transcript is generated again with your updates. When ready, you can download the new version. If you made the transcript available to

the audience, the transcript is also updated in the event recording.

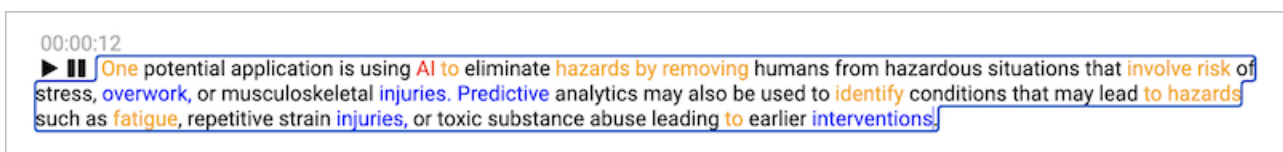

### To edit the transcript:

1. Sign in to the Webcast Admin portal and edit the event.
2. On the Event Summary tab, click **Launch On-Demand Studio** or **Launch SimLive Studio**.
3. In the editing studio, under the video player, click **Transcript**.

4. The transcript is displayed in the Edit Transcript window. Review the transcript in the Full Transcript section.

To compare the audio to a phrase, click the **Play** button. To edit the transcribed text, click a phrase and then type your changes. To stop editing, click outside of the phrase.

5. To find and replace words or phrases, enter a word or phrase in the search bar and press **Enter**. Click **Replace All**, enter what you want to replace the phrase with, and click **Apply**.
