

Have a professional emcee host your event

Available for video bridge events only.

For a polished experience, have a professional emcee host your event. An emcee speaks directly to your attendees and presenters, and manages the flow of the event for you. They can appear on camera or stay off camera.

Services provided

The emcee will join your event early, during the pre-event review, and introduce themselves. During the event they:

- Provide opening and closing remarks
- Deliver presenter introductions and announcements
- Manage webcam layouts, ensuring the right presenters are on stage
- Facilitate Q&A
- Perform other speaking tasks as requested by you

We recognize that every event is unique and our emcees are ready to adapt to meet your needs and expectations for the event.

Request an emcee for an event

To request assistance running your event, first sign in to your webcast account, [schedule the event](#) (as you normally do), and make a note of the event ID.

Contact Support or your sales representative or complete the online request form linked in your welcome email (if included).
